Amendment to the Claims:

The following listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A system for treating a vascular condition, comprising:

a catheter body;

an inflatable balloon disposed on the catheter body;

a plurality of concentrically disposed restrictors circumferentially disposed on the inflatable balloon, wherein one or more restrictors are at least partially removable to allow expansion of the inflatable balloon to a predetermined size and wherein selection of the one or more restrictors determines the predetermined size; and

inflation means to inflate the inflatable balloon, the inflation means coupled to a proximal end of the catheter body.

Claim 2 (original): The system of claim 1 wherein the catheter body includes an inflation lumen and an inflation hole adjacent to the inflatable balloon, wherein the inflation lumen and the inflation hole allow inflation fluid from the inflation means to inflate the inflatable balloon.

Claim 3 (original): The system of claim 1 wherein the one or more restrictors are partially removable to allow expansion of the inflatable balloon to a predetermined balloon diameter.

Claim 4 (original): The system of claim 1 wherein the one or more restrictors are partially removable to control an expandable length of the inflatable balloon.

Claim 5 (original): The system of claim 1 wherein the one or more restrictors are frictionally coupled to the inflatable balloon.
